# Token Strategic Directions

## *What is the problem with Token Business?*

1 Due to **improper and unfair token distribution**, the entire project collapses and harms players and communities

2 Due to the **team's holding too many tokens**, liquidity is reduced and players are not properly rewarded.

3 **Inappropriate vesting period setting** causes problems with compensation for investors and project sustainability

4 Continuous failure to attract players and decrease in token value due to **poor game story and lack of influence of tokens in the game**

*It is necessary to establish a token distribution strategy that can sustain the project.*

## *Where we want to go ?*

Reasonable profit distribution to all players participating in the project through sustainable and fair token distribution

Ensuring project continuity through sufficient staking period and distribution

Provide sufficient vesting period for investors to fully exercise their rights

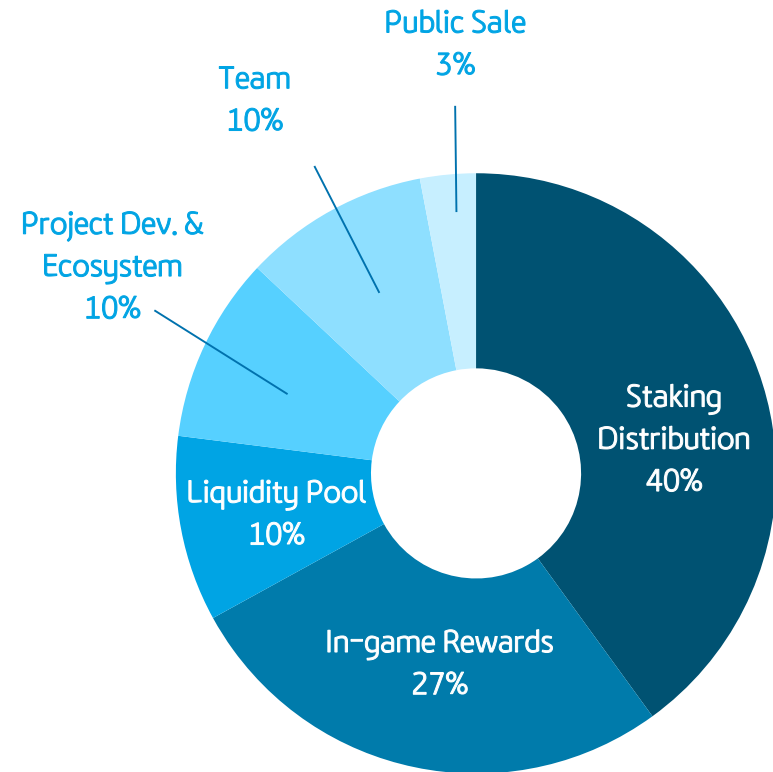

Through fun and great game story and design, attracting many players and generating continuous profits
